DETAILED ACTION

Location of Application

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1634.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a method for determining a characteristic of a microorganism, classified in class 435, subclass 7.2.
 - II. Claims 7-12, drawn to an ultracentrifuge a method for determining the identity of a microorganism in a biological sample, classified in class 435, subclass 7.2.

3. The inventions are distinct, each from the other because of the following reasons:

Groups I and II are distinct and independent inventions in that they are directed to methods which are directed different method steps. As a result, different and distinct searches will have to be performed. For example, the search required for Group II such as step (b) in claim 7 is not required for Group I.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I (for reason, see above), restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application.
